

## Portrait Photography Masterclass

The Art of Capturing Emotive and Flattering Portraits through Light

\$125.00

Elevate your photography skills by delving into the craft of portrait photography. Join us in this comprehensive workshop designed to empower photographers to master light. Learn how to create emotion, style and beauty in your portraits.

### Key Workshop Components:

**Exposure Essentials:** Understand the trifecta of Aperture, Shutter Speed, and ISO. Learn how each facet influences and shapes the final image, allowing precise control over a quality exposure.

**Mastering Lighting:** Get an easy to understand definition of various lighting types—Ambient, Main, Fill, Background, and Accent lighting. Harness the power of light to sculpt details and evoke desired effects in your subjects.

**Composition and Artistry:** Explore the fundamentals of composition and an array of techniques, including: Leading Lines, Shapes, Foreground, Background, Rule of Thirds, and more, discover how to compose portraits that have impact.

Throughout the workshop, we'll decode the art of using light to capture emotions and expressions. We will also look at focal length, posing and facial light patters. Bob will showcase his portrait setup and interaction with subjects. This hands-on workshop offers ample opportunities to practice professional posing techniques while utilizing studio lighting to gain a better understanding of using natural light.

Join us for an immersive experience where you'll not only refine your technical skills but also develop an intuitive understanding of how light and technique to create your own style of portrait photography

Instructor :Robert Akers, Certified Professional Photographer, Master of Photography
